Description

**Virtually Inert to Chemical and Biological Agents**

- Outstanding wet strength
- High chemical resistance
- Provides a channeling effect for liquid, increasing overall filter flow rate when used in series with submicron membrane filters
- Ensures stability when filtering concentrated acids, alkalies, or oxidizers

Application

- Good prefilter for heavily particulate-laden and viscous fluids
- Can be folded or handled the same as laboratory paper
- Can be used as separators between stacked discs in a single filter holder during serial filtration

Specifications

**Filter Media**

- Polypropylene/polyethylene

**Pore Size**

- 10 µm (nominal)

**Typical Thickness**

- 127 µm (5.0 mils)

**Maximum Operating Temperature - Water**

- 107 °C (225 °F)

**Sterilization**

- Provided non-sterile; autoclavable if desired
